eEarth

Interactive Open Access Journal of the
European Geosciences Union

Aims & Scope

eEarth (eE) uses an open access interactive format to publish short, topical papers in all disciplines of the Earth Sciences. The length of papers is limited to four journal pages, which corresponds to about 3000 words, a maximum of 30 references and no more than 5 figures and tables. Its scope ranges from processes in the deep interior of the Earth and the terrestrial planets; magmatism, metamorphism and volcanism; the creation, deformation and destruction of lithosphere; fluids, fluxes, and reservoirs of mineral and energy resources; surface processes such as erosion, transport, deposition of sediments and resulting geomorphology; and the response of the Earth to climate change. The length of papers is limited to four journal pages.

eE has an innovative two-stage publication process which involves a scientific discussion forum and exploits the full potential of the internet to:

- foster scientific discussion;
- enhance the effectiveness and transparency of scientific quality assurance;
- enable rapid publication;
- make scientific publications freely accessible.

Journal Facts

→ **Service Charges waived for 1000 pages published in eE!**

Publication Policy

eEarth (eE):

- Publication of top-quality revised papers emerging from an innovative two-stage process of Public Peer-Review and Interactive Public Discussion.
- Free online access to all articles following the Open Access publication model.
- Low service charges depending on the submitted file category.
- No extra charges for color illustrations and supplementary material, e.g. movies, data sheets.
- Authors keep copyright. Papers are published under the Creative Commons Attribution – Non Commercial License.
- Long term archiving & e-archiving and indexing in scientific databases & search engines worldwide.
- Efficient new way of publishing special issues.
- Moderate charges for printed issues.

eEarth Discussions (eED):

- Rapid publication of high quality manuscripts as discussion papers, freely accessible.
- Papers undergo access review and technical corrections before publication.
- Interactive Public Discussion: immediate publication of referee comments, author comments and short comments alongside the discussion paper.
- Individual citability of all discussion papers and interactive comments.
